fresh ideas

and perspectives to
make net zero a reality.

Finance and risk virtual bootcamp

Are you a finance student interested in learning about a career in the energy industry? Our virtual finance and risk bootcamp is a perfect opportunity to learn about our various functions that support our trading & shipping entity, such as commodity risk, market risk, valuations, accounting policy, working capital, structured trade finance, credit risk and commercial development! You'll gain experience through interactive presentations, discussions with leaders, Q&A sessions and hearing directly from our recruitment team on the application and interview process. After successful completion of the bootcamp, participants will be eligible to submit early applications to the intern program and potentially fast-track to a technical interview!

Program dates

Monday, July 24th- Friday, July 28th | 10:00am to 1:00pm CST each day.
